

# Preliminary Consumption Information

January 2019

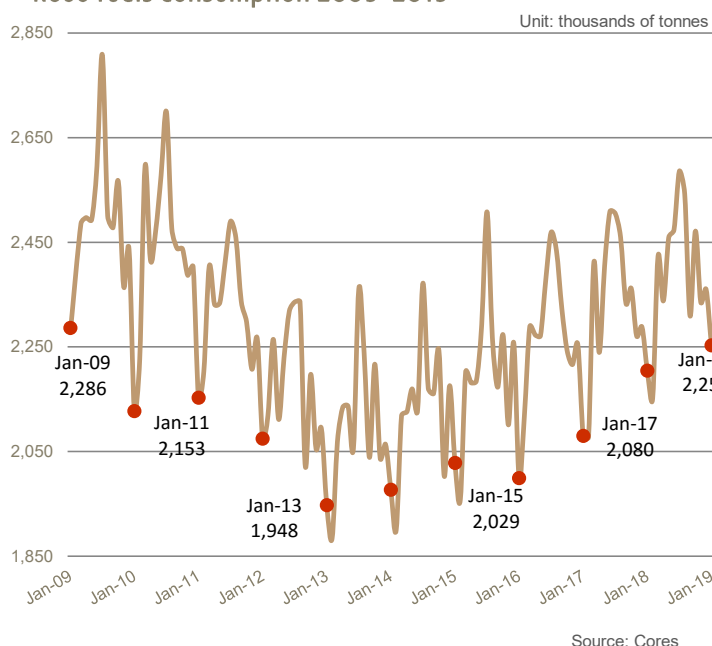

Conventional consumption of natural gas (32,992 GWh) reached the maximum since available data (2004)

Again, road fuel consumption increased in January (+2.2% vs. January 2018), having surpassed the last months of January of the 9 previous years. Both gasolines (+6.3%), best January data from 2011, as well as road diesel (+1.4%), best January data from 2008, rose.

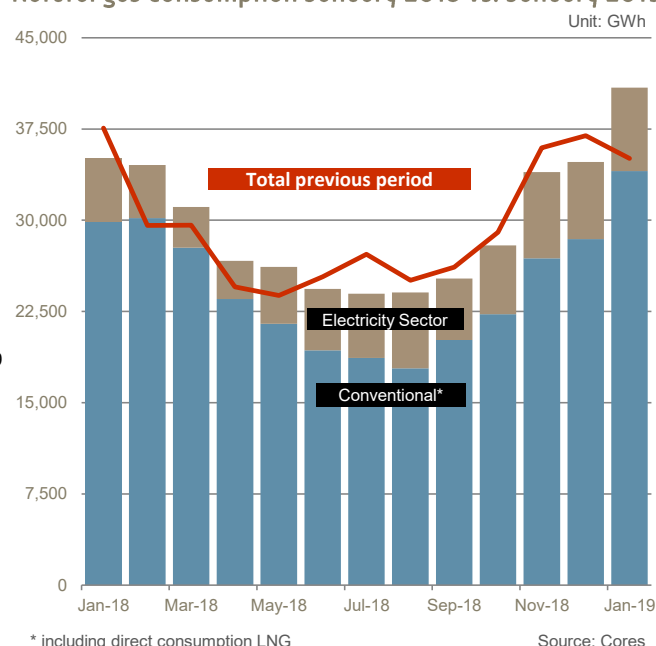

This month every petroleum product group increased: LPG (+37.1%), gasolines (+6.3%), gasoil (+6.0%), kerosene, which rose again after the slight decrease of the previous month (+6.2%), and fuel oil (+13.6%).

Natural gas consumption, after seven months of decreases, increased in January (+16.6% vs. January 2018), having reached 40,910 GWh, the highest value since February 2008. This month every consumption type rose: natural gas intended for electricity generation (+32.4%), direct consumption LNG (+17.3%) and conventional consumption (+13.8%), having reached 32,992 GWh and having surpassed the previous maximum for this type of consumption (30,255 GWh; February 2012) since available data (2004).
